Bahria College Karachi (Nore-I)
2020-2022

ABOUT ME

I am Kamran Iqbal, a Full Stack Developer who is passionate about developing dynamic web apps using MERN stack and Django. Using React.js, especially Next.js with its performance advantages and server-side rendering features, I specialize in developing user-friendly interfaces acquired from. On the backend side, I rely on Node.js and Express.js for building strong APIs as well as Django whenever creating high-performance web applications. Additionally, I utilize MongoDB and MySQL for efficient data storage and backend integration.

PERSONAL PROJECTS

- Project Management app (MERN/GraphQL/Bootstrap)**
Developed a versatile project management app that streamlined client and project administration. The app enables efficient client onboarding, project creation, and assignment, while offering flexibility for adjustments throughout the project lifecycle.
- Authentication app (NextJS/NextAuth/OAuth/Nodemailer)**
Developed an intuitive Authentication App blending Basic Authentication, OAuth (Gmail and GitHub) integration for seamless user access control. Effortlessly oversee user authentication with password recovery and email verification, ensuring secure and simplified user experiences.
- Construction Workshop app (ReactJS/Django/GraphQL)**
Developed a powerful Construction Manager App for real-time task management. Owners can effortlessly add, manage, and track tasks, streamlining workflows and efficiently handling service orders.
- Ecommerce app (Django/MySQL)**
Developed a dynamic Ecommerce App for a simple and enjoyable shopping experience. Users can manage their cart, checkout with ease, redeem codes for discounts, and secure transactions through Stripe.
